DESCRIPTION

JM Posner Are proud to introduce our latest (and greatest) waffle maker for commercial caterers.

A first of its kind, the Multi Waffle by JM Posner has a huge choice of 8 different waffle plates, so if you would like to serve traditional round Belgian waffles, follow the latest craze in bubble waffles or stick waffles for eating on the go, look no further. The Multi Waffle is also the most compact unit we have produced. This smaller footprint will give you more space on your counter to work with. The Multi Waffle comes with an auto start function that can be pre-set to any time you would like, an essential feature if you have busy staff that may forget to turn on the timer when you start cooking (its easily done when busy!).

The 9 interchangeable plates* are easily removable so that you will be able to quickly change them on site to react to your customers ever changing demands. All of the plates are supplied with non stick Xylan coating, this offers perfect waffles without the need to spray the plates with oil. The Multi Waffle is also designed with the future in mind, it allows us the opportunity to add new waffle plates as times and trends change and even allows for custom made plates.

KEY FEATURES

- Compact and contemporary
- Interchangeable waffle plates x 9
- Xylan Coating for exceptional non stick results
- Auto Start
